

1981 Elections – First phase

This data file represents the answers of respondents to the first 1981 interview (March 1981 – the first phase). The relevant Hebrew questionnaire is the 1981 first phase questionnaire. However, there is only one English questionnaire for 1981 elections, which is the translation of all three Hebrew questionnaires together, one after another.

Notes

- 1) Page count includes first page and introduction page.
- 2) Question number 15 in the first record of both the Hebrew & English questionnaire is not represented in the data.
- 3) Questions 11-15 in the 2nd record of the English questionnaire (p.18-19) refer to Moshe Dayan and not Menachem Begin. The questions about Begin end in number 10. This is not clear in the English questionnaire, so you can use the codebook value labels (variables V87-V91).
- 4) For the meaning of questions 41-43 in the 2nd record of the English questionnaire, see labels of the according variables: V116-V118.
