

## 1996 Elections

This appendix refers to two data files/codebooks: The 1996 Jews' data file and the 1996 Arabs' data file. The questionnaire was, in general, the same for both groups. However, there are a few differences, which are listed at the end of this appendix.

Variable	Record	Hebrew Questionnaire		English Questionnaire

### Notes

1. Page number count includes the first page and the introduction page.
2. English questionnaire does not include questions 26-41 of the 4<sup>th</sup> record in the Hebrew questionnaire (“date of interview”, “code of locality”, “area”, “phone number” and “interview group”); but the variables representing them exist in the codebook and in the data (except “phone number” and “area” variables – see explanation below).
3. Question 30 & 32, 4<sup>th</sup> record, p.28 in the Hebrew questionnaire (“area” ,“phone number”) do not exist in the data.
